

# WGCG Summer Social field walk in Leek Wooton

Field trip leaders Jane Allum, Stuart Burley and Ray Pratt

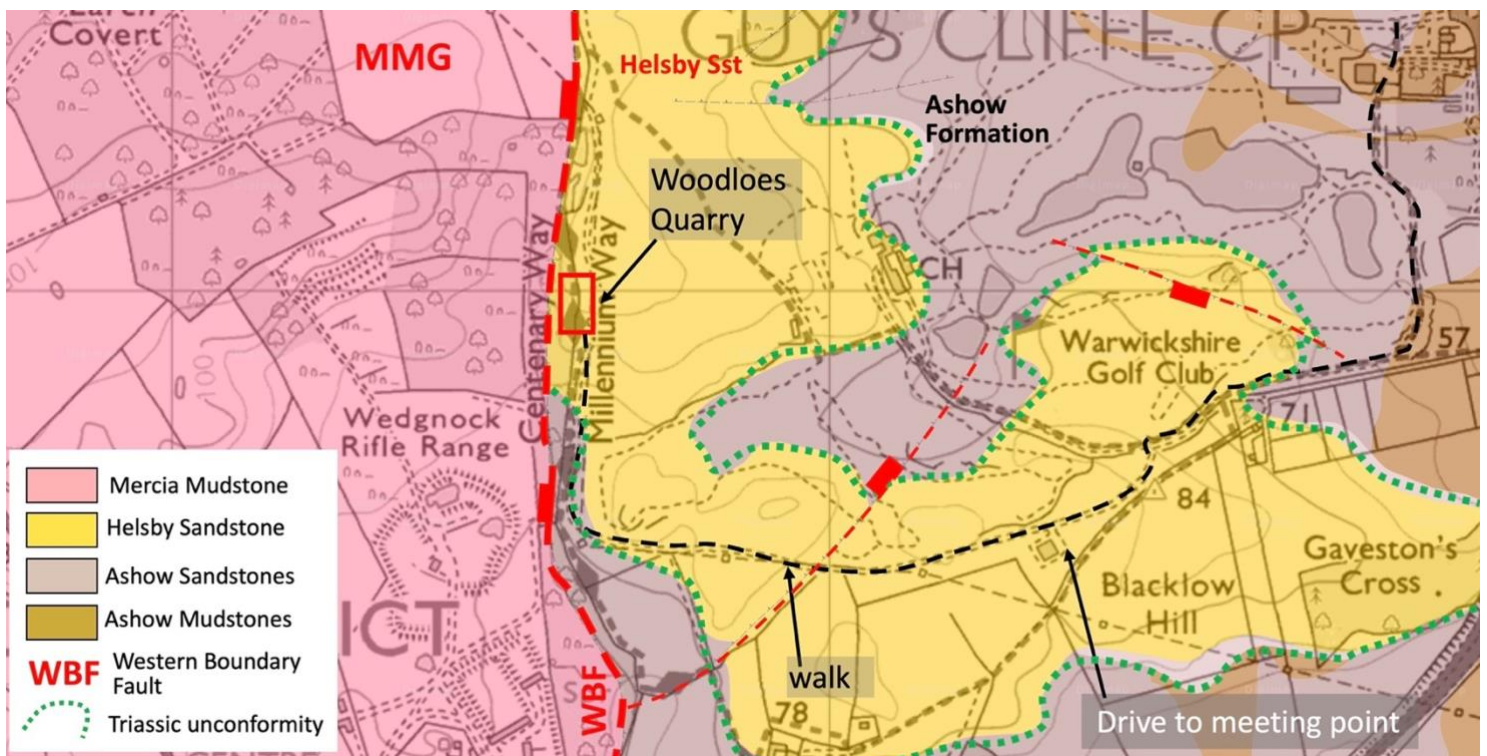

**5<sup>th</sup> August 2026 meeting point at Leek Wooton Golf Club Groundsman's compound**

This is a gentle summer evening walk along the Millennium Way footpath on the western side of Leek Wooton golf course to visit North Woodloes Quarry, recently cleaned by WGCG Conservation Committee, and to examine exposures in the village of Leek Wooton near the Anchor public house. We will take refreshments in the Anchor after the walk. The round trip walk to Woodloes Quarry is 2.4km over undulating ground on a well-established footpath.

These exposures are of the Middle Triassic Helsby Sandstone Formation, known locally as the Warwick Sandstone, and nicely supplement the spectacular exposures of the Helsby Sandstone at Guys Cliffe, revealing complex bedding structures and beautifully preserved calcified fossil root structures. Participants will discuss the type of river deposits represented by the sandstones and what the root structures tell us about sand bar stabilisation and Triassic water tables.

## The field trip Itinerary is

- 17:45 Meet, registration and HSE at Leek Wooton Golf Club – Groundsman area.
- 18:00-18:15 Walk to Woodloes Quarry LGS 81 (W3W: [///admire.goldencontinues](http://admire.goldencontinues.com), SP 276 679)
- 18:15-18:45 Examine and discuss the geology of the quarry faces
- 18:45-19:00 Return to cars and drive to Anchor Pub Car Park
- 19:30 Congregate at Leek Wooton bus stop on Warwick Road for exposure 2.
- 19:45 Head to Anchor pub for food & drinks <https://www.anchorleekwootton.co.uk/>
